ELLIOT HUCK

SUMMARY

I am always excited to learn something new. I think my favorite thing about coding is the unique balance of logical problem solving and creative expression.

My three professional values are **curiosity**, **creativity**, and **clarity**. I love to tinker with things and figure out how they work, I'm always exploring innovative ways to improve systems and processes, and I have a passion for communicating information in a way that is clear, honest, and engaging.

EDUCATION

Nashville Software School
Full-stack web development

Vanderbilt University
BA Economics, BA Spanish

EXPERIENCE

Nashville Software School, Nashville TN   May 2018 – Nov 2018
Full-Stack Web Developer
  + Applied coding knowledge to group and individual projects reflecting real-world business scenarios in a simulated Agile environment
  + Managed version control with Git and GitHub
  + Implemented GitHub Projects & Issue Tracking for project management
  + Learned fundamentals of OOP, such as writing modular, readable code
  + Built single-page web applications using HTML, CSS, jQuery and React
  + Automated tasks with Grunt, including ESLint and Browserify
  + Designed applications by planning dependencies and building ERD's
  + Created and modified databases using SQL and SQLite
  + Created RESTful APIs with C# and .NET framework

Simplify Compliance, Nashville TN   Apr 2017 – May 2018
Independent Contractor
  + Collaborated across multiple departments within the company
    - Publishing: maintained database of attorney records for the Tennessee Attorneys Directory
    - Collections: called customers to collect late or missing payments
    - Circulations: entered orders into a payment processing system

Red Hat, Nashville TN   Sep 2016 – Mar 2017
Customer Success Manager
  + Participated in standing up a new Red Hat Customer Success initiative
  + Took individual responsibility for increasing data pipeline efficiency by using Excel to create interactive models and proposals
  + Developed relationships with Red Hat customers across 120 accounts
  + Assisted customers by troubleshooting issues and providing them with resources to resolve problems
  + Gained familiarity with the Red Hat ecosystem and IT environment

Wells Fargo Bank, Nashville TN   Jun 2015 – Sep 2016
Lead Teller
  + Served as a supervisor and mentor of other tellers
  + Prevented over $34K in potential losses from fraudulent activity
  + Created and implemented new systems to streamline daily processes

PROJECTS

Vocabulous – *Front-end capstone*
www.github.com/elliot-huck/vocabulous

A vocabulary-building app that allows a user to view random dictionary words and their definitions, save them to a personal word list, and then take quizzes on those words to build vocabulary knowledge. Built using React, JSON Server, Bloomer, and the Wordnik API.

React Nutshell – *Group project*
www.github.com/Preposterous-Pandas/reactive-nutshell
React Nutshell is a faux social media site that allows a user to chat, add friends, post events & articles, and view a To-Do list. I wrote the code in the /src/Components/Tasks directory. Built using React and JSON Server.
